

Dr. Peter Boone– Connecticut meets SwiftPath

SwiftPath is proud to announce that Dr. Boone has joined the SwiftPath Team of Surgeons. "The SwiftPath Program gives us joint replacement surgeons a proven pathway to better outcomes and more cost-effective care," says Dr. Boone. As the demand for joint replacement grows, there's more push for surgeons to document outcomes. This is why Dr. Boone joined SwiftPath. According to Dr. Boone, SwiftPath provides the tools that allow surgeons to work effectively in this new environment.

Dr. Boone has been practicing joint replacement at Orthopedic & Sports Medicine Center for over 20 years. Committed to excellence in patient care, Dr. Boone constantly challenges himself to improve the quality of service and outcomes for his patients. We look forward to seeing Dr. Boone flourish using the SwiftPath Method.

SwiftPath Surgeon, Peter Boone, MD

Patient Engagement– A blockbuster!

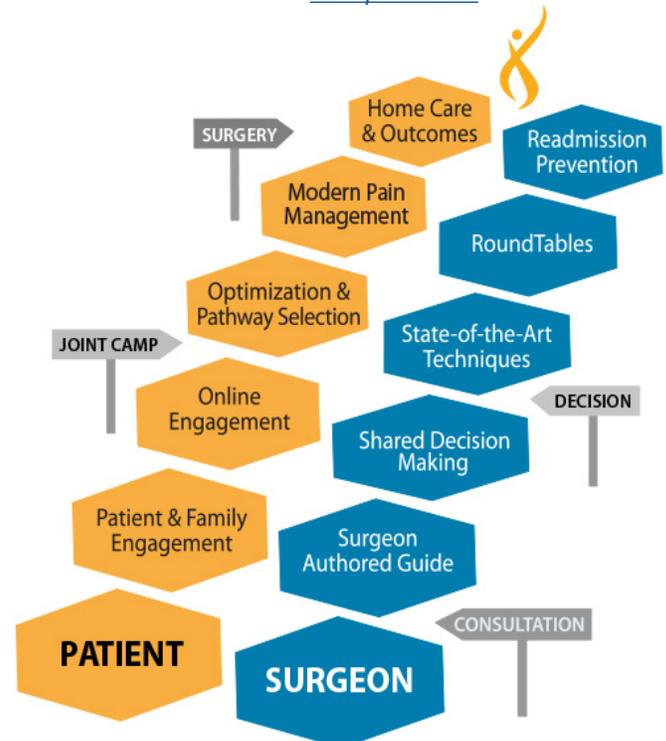

According to SwiftPath surgeon Dr. Tom Meade, we've tested a new "drug." It's a blockbuster. It results in less pain and minimal use of narcotics after surgery; patients get up within a few hours; many go home the same day. It decreases re-admission; it increases patient satisfaction. "It's called Patient Engagement," says Dr. Meade. "That's the drug."

Patient engagement is a key component and vital tool in a successful surgery. SwiftPath patients are equipped with the tools and knowledge to understand what is expected of them. When they take an active role in the entire process, it positively impacts the outcome.
