

SwiftPath Named as a Top 10 Solution Provider

SwiftPath is making the unthinkable a reality in joint replacement with their superior outpatient program.

While interest in the outpatient delivery model has witnessed a steady rise in the U.S. because of reduced recovery time and cost, SwiftPath is charting a new pathway and standard in surgical outcomes.

Apart from delivering quality clinical processes through minimally invasive techniques, improved pain management, and an early discharge, the SwiftPath program's distinctive feature lies in its next generation patient engagement and optimization model for enhanced recovery. [Read full article](#)

SwiftPath Meeting in Miami Draws East Coast Surgeons

SwiftPath held a meeting on November 10, 2017 in South Beach in Miami. The meeting's purpose was to share ideas on best practices for launching or improving an outpatient joint replacement program. Additional topics included:

- **Partnerships that Reward Surgeon Excellence:**
Corporate Model, Private Equity, REITs
- **Creating Efficiency in the Cloud**
- **TeleHealth**
- **Online JointCamp**

Private Equity and ASC Outpatient Joint Replacement

Forecasts by Sg2 and others suggest 50 percent of joint replacements will be done as outpatient procedures. **Medicare has released an outpatient code for total knee replacement for January 2018, and is likely to do the same for hip replacement.** As a result, SwiftPath has been contacted by private equity investors showing keen interest in investing in orthopedic groups that are positioned to lead the transition of joint replacement into the outpatient space. “Today's forward-thinking surgeons see private equity as an attractive alternative to hospital employees. In fact, many now see a private equity partnership as the key to remaining independent, spending more time with patients, improving patient care and creating stable growth.”

- Craig McAllister, MD, SwiftPath President and CMO

SwiftPath TV: An Invaluable Resource

SwiftPath TV offers a library of video resources available to SwiftPath surgeons, patients, and surgeons not part of the SwiftPath Program. These resources range from surgical technique videos and patient education, to rapid rehab protocols using clinical and patient reported outcomes—and more.

Go to swiftpath.com/tv/ to explore our video library.
